LZY offers large, compact, transportable, and rapidly deployable solar storage containers for reliable energy anywhere. LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar. The flagship model offers a powerful 150kW PV array and 430kWh of energy storage. With scalable solar capacity of 30-200kW and battery storage options from 50-500KWh, Solarfold™ provides reliable power wherever. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. It's road-ready and quick to deploy, making it ideal for remote worksites, disaster relief, events, and temporary camps — and in many cases, it can replace grid connections or. Solarfold allows you to generate electricity where it's needed, and where it pays to do so. The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems.
