

Saint lucia microgrid operation

Overview

The Government of Saint Lucia is spearheading a transformative resilience initiative through the deployment of a renewable energy microgrid and solar-powered water pump project at two public schools in Dennery. Arlington, VA - Today, the U. USTDA's assistance will help. Dennery, St. Design and Engineering Services required under this project are as follows: 1. Microgrid Design for up to six separate locations on the SLU Grid. USTDA's assistance will help develop. USTDA's technical assistance will advance Saint Lucia's efforts to build resilient microgrid infrastructure that can withstand severe weather events and provide continued power supply to hospitals, schools, communications towers, and water treatment plants. Aligned with the EU's Global Gateway strategy, it works with 33 partner countries and regional organisations to enable sustainable investment, improve access.
