

Small solar power generation price query table

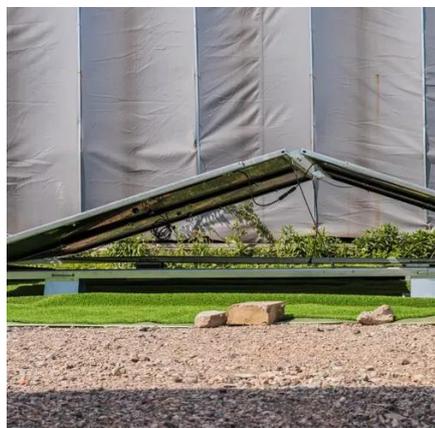

Overview

Installation costs for a small solar generation set typically range from \$2,500 to \$15,000, depending on system size and geographic location. Key factors influencing this pricing include labor expenses, roof conditions, and whether installation is performed on-site or through a contractor. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. 2024 ATB data for utility-scale solar photovoltaics (PV) are shown above, with a base year of 2022. The Base Year estimates rely on modeled capital expenditures (CAPEX) and operation and maintenance (O&M) cost estimates benchmarked with industry and historical data.
