

Solar Base Station Flywheel Energy Storage Lightning Protection Contract

Overview

Battery Energy Storage Systems (BESS) play a vital role in stabilizing the grid and integrating renewable energy, but they face significant risks from lightning. At Scientific Lightning Solutions, we ensure BESS resilience by integrating comprehensive lightning . Beacon Power is developing a flywheel energy storage system that costs substantially less than existing flywheel technologies. Flywheels store the energy created by turning an internal rotor at high speeds-slowing the rotor releases the energy back to the grid when needed.
