

Solar energy prices for solar panels in Western Europe

Overview

Solar PPA prices dropped for the third straight quarter on LevelTen's Market-Averaged Continental Index, posting a 1% decline. Europe has quietly become one of the most competitive regions in the world for solar panel pricing. Thanks to a mix of supportive government policies, competitive installer markets, and a strong push for renewable energy, many European countries now offer some of the lowest solar panel prices. The cost of solar panels has dropped by more than 80% over the past decade, making them more affordable than ever. Year-over-year, European P25 solar PPA prices have gone down by approximately 8%. In many markets, demand for renewables is lagging behind.
