

Solar generator heating

Overview

Yes, a solar generator can power a heater—but with critical limitations. Solar power is one choice, and you can use it in two main ways: with solar heaters or solar generators. Solar heaters work by directly turning sunlight into heat. They grab the sun's rays and change them. Solar Generator Functionality: A solar generator consists of solar panels, a battery, and an inverter, converting sunlight into electrical energy suitable for powering devices like space heaters. In this article, we will explain the differences between these two options.
