

Solar photovoltaic panels facing south

Overview

Solar panels should face true south, not magnetic south. Use NOAA's magnetic declination calculator to find your local value and adjust accordingly. Choosing the best roof location for solar panels maximizes energy production, extends panel life, and simplifies maintenance. In the United States, the most productive installation typically faces south to capture the sun across the year, but real-world results depend on tilt, shading, and roof. East-West Orientations Offer Strategic Value: While producing 75-85% of south-facing output, east and west-facing panels can provide superior financial returns by aligning with time-of-use electricity rates and matching typical household consumption patterns. However, factors such as roof slope and proximity to the equator may have some homeowners considering other directions (including north).

Solar photovoltaic panels facing south

Best Direction for Solar Panels to Maximize Savings -- SolarReviews

Best Solar Panel Direction For Every Goal
Best Solar Panel Direction Overall
South to Southwest Is Best For Tou Rates
How Much Does Solar Panel Direction Impact output?
What If Your Roof Doesn't Face South?
Does Solar Panel Angle Matter?
How to Calculate Output on Your Roof Based on Its Direction
South is the best direction for solar panels to face overall. In nearly all situations, you will see the greatest utility bill savings and quickest payback period if your panels point south instead of in another direction. South-facing panels have superior economics for the following reasons: 1. They generate more solar energy 2. They allow you to See more on solarreviews
Independent Power

Does My Roof Have to Face South for Solar? , Home ...

For homes in the northern hemisphere, south-facing solar panels do receive the most direct sunlight throughout the year. However, a south-facing roof is by no ...

The Best Direction For Solar Panels to Face

South is the best direction for solar panels to face overall. In nearly all cases, homeowners will achieve the highest electric bill savings and a quickest payback period by facing their solar panels south over ...

Best Direction for Solar Panels to Maximize Savings -- SolarReviews

In the United States, the best direction for solar panels to face is south as it exposes them to the most sun and allows them to produce the most electricity possible. Solar panels that face east or west will ...

[Does My Roof Have to Face South for Solar? , Home Solar 101](#)

For homes in the northern hemisphere, south-facing solar panels do receive the most direct sunlight throughout the year. However, a south-facing roof is by no means a necessity for a productive and ...

Best Angle for Solar Panels (& Direction): Every State & Zip (Azimuth)

Recent studies have indicated that the best direction for solar panels to face in the United States is between the south and west poles.

[Solar Panel Direction & Orientation: 2025 Complete Guide](#)

Discover the optimal direction and angle for solar panels to maximize energy output. Complete guide with calculations, tools, and location-specific recommendations for 2025.

[What is the Best Direction for Solar Panels](#)

[to Face](#)

Discover the best direction for solar panels and factors affecting energy output. Know why south-facing is ideal for solar panels and what its alternatives are.

Maximize Efficiency: Best Direction for Solar Panels , Sunrun

Learn the best direction for solar panels to optimize energy efficiency and savings. Find expert advice on positioning your panels for maximum performance.

[Solar Panel Placement: Best Direction & Orientation Guide](#)

For homeowners in the northern hemisphere, south-facing panels are ideal. Since the sun travels across the southern half of the sky, this direction ensures maximum exposure throughout the day. Studies ...

Best Roof Location for Solar Panels: South Facing Tilt and Shading

South-facing roofs provide the best annual output, with the potential for shading from surrounding trees. Consider a slightly steeper tilt to reduce snow buildup and to maximize panel ...

[Solar Panel Orientation: Everything You](#)

Need to Know

The general rule for solar panel placement in the northern hemisphere is that solar panels should face true south (and in the southern, true north). This is usually the best direction ...
