

Solar power generation roof panels

Overview

Solar panels on a roof collect sunlight and transform it into electricity using photovoltaic cells. 30 per watt in 2025, representing a 60% decrease from 2010 levels. Combined with the 30% federal tax credit extended through 2032, most homeowners can achieve payback periods of 6-12 years with 25+. In a perfect world, the average roof in the U. can generate around 21,840 kilowatt-hours (kWh) of solar electricity annually—that's more than most homes need. But also, the world isn't perfect. Realistically, your roof's solar generation potential will be less than that. Solar panels—made of silicon. Many areas offer attractive Renewable Energy Credits (RECs) that, when coupled with federal and local incentives, can make rooftop solar an attractive financial choice that is also good for the environment.
