

Solar power monitoring and control system

Overview

A solar monitoring system can help you keep track of your solar panel system's energy production, usage, and efficiency in real-time. Solar panels sit on your roof for decades, silently making electricity from the sun, saving you money and saving the planet a little bit each day. Clicking “Get Your Estimate” submits your data. Utility-scale solar power stations with electric power capacity of more than 50 MW and the capability to feed excess power back to the electric grid for future consumption, are being built to meet the growing demand for solar power. A utility-scale solar power plant can consist of hundreds to. The Rockwell Automation Solar Power Field Monitoring System provides SCADA functionality to integrate solar generating capacity into a centralized monitoring system.
