

# Tashkent electric vehicle costs

## Overview

---

The average cost of an electric car decreased to \$9.3 million, which is 17% more than in 2023. Avatr 11 offers a wide range of features suitable for various driving conditions: Range: up to 700 km on a single charge — ideal for daily commutes and long-distance travel. Charging Time: fast charging up to 80% in just 30 minutes, perfect for active lifestyles. Power: 400 horsepower with 0-100. Deliveries of electric vehicles increased by 50%, reaching 24 thousand units, but in monetary terms there was a decrease of 48.48 thousand units with a total. These include tax exemptions on the import and sale of EVs, subsidies for manufacturers, and reduced registration fees for electric vehicles. Such measures are designed to make EVs more affordable for consumers and stimulate market growth. The capital's administration reported.
