

The old village chief talks about solar power generation

Overview

This is the story of a small farming community that didn't just install solar panels—they started their own solar power company. TAIYUAN, May 8 (Xinhua) -- At the photovoltaic charging station in Zhuangshang Village, where dozens of agricultural vehicles are parked, farmer Chen Jiahong is charging his electric tricycle. "A full charge, enabling a drive of 50 km, costs less than 2 yuan (about 29 U. "A high pile of firewood meant a secure winter," said the 75-year-old, recalling how each log represented warmth and survival. The power project has covered 27,000 villagers who at the time were living below the poverty line. This community has demonstrated how innovative approaches to renewable energy can not only meet daily needs but also promote sustainability and resilience. By harnessing the sun's. In a remote corner of rural India, where erratic electricity supply was once a fact of life, an entire village came together to build a solution so bold it drew national attention. While large cities debate clean energy policies and power companies race to adopt green technologies, this village. If there is an achievement that has transformed the face of a small village to become a global phenomenon, Modhera would rank amongst the leading names in the category of solar.
