We are a. Grid-tied solar dominates the market for good reason: With system costs ranging from \$2.00 per watt installed and federal tax credits of 30% through, grid-tied systems offer the fastest payback periods (6-10 years) and highest returns on investment without requiring expensive battery. High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years. Transitioning to solar can also help the country meet. Honda: Known for reliable portable inverter generators; quiet and safe for electronics.
