2S LiPo Batteries 7.4v

2S LiPo batteries built with two cells in series providing 7.4v. All MaxAmps LiPo pouch batteries are assembled in the USA.

Making a 2S 7.4V LiPo Battery Pack

In this post, we'll explore the 2S 7.4V LiPo battery pack, its applications, and a step-by-step guide on creating one yourself. Please remember that working with LiPo batteries can be dangerous if not ...

Such a configuration is called 4s2p, meaning four cells in series and two in parallel. Insulating foil between the cells prevents the conductive metallic skin from causing an electrical short.

The battery industry specifies the number of cells in series first, followed by the cells placed in parallel. An example is 2s2p. With Li-ion, the parallel strings are always made first; the

completed parallel units are then placed in series. Li-ion is a voltage based system that lends itself well for parallel formation. Combining several cells into See more on batteryuniversity lithiumhub
