Overview

Battery-electric vehicles (BEVs) made up 19.6% of the UK's new car market in 2024, registering a total of 381,970 units sold. This represented an impressive increase of 21%. However, despite this growth, the segment still. From 2020 to 2023, the United Kingdom and Germany battled among large countries in Europe for the highest sales share of battery electric cars, and as 2023 drew to a close, Germany had the upper hand (Figure 1). This was following soaring EV sales as net zero laws tightened in the UK.
