

# Use universal angle iron to make photovoltaic panel bracket

## Overview

---

In this guide, we'll explain what solar panel mounts are and why they matter, provide a step-by-step walkthrough to build solar panel ground mounts yourself, share tips to boost your system's efficiency, cover essential permitting and safety info, and even show how. In this guide, we'll explain what solar panel mounts are and why they matter, provide a step-by-step walkthrough to build solar panel ground mounts yourself, share tips to boost your system's efficiency, cover essential permitting and safety info, and even show how. Making Solar Panel mounts, what thickness angle iron?

I am going to make my own solar panel mounts using 2 aluminum 1 1/2. Do I need the heavy 1/8" or will the thinner do?

Reason I am asking is I will need to cut them to size and the upper portion may need to be ripped so as to. Use of the above brackets depends on the orientation of your unistrut. If the unistrut is running perpendicular to the solar panel then the most likely way to use these brackets would be on the top and bottom rails of the panel. Sorry, an unexpected error has occurred. The Tilt Mount System is listed to UL 2703, and compatible with most roof anchor products.
