

Vertical Storage Rack for Tunnel Use

Overview

The Vertical Storage Rack is designed to store and organize tubing, pipe, and other similar materials. Each unit has 4 bays each that measure 9-3/4" wide. For best use, it is recommended the unit be placed up against a wall for vertical or horizontal storage. Why is it so effective?

Because of its simple and economical structure. Price and other details may vary based on product size and color. The system consists of rack structures, shuttles. To achieve the optimal use of the available space, ELVEDI offers various types of vertical storage systems that can store long and flat goods vertically or sideways.
