

What is the price of vanadium solid-state energy storage batteries

Overview

In 2023, the average VFB system cost ranged between \$400-\$800 per kWh for commercial installations – a figure that masks both challenges and opportunities. Vanadium electrolyte constitutes 30-40% of total system costs. During the third quarter of 2025, the vanadium prices in the USA reached 9766 USD/MT in September. Prices increased as firm consumption from the alloy, aerospace, and energy-storage sectors supported higher procurement activity. Some tightening emerged due to fluctuations in upstream mining output. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.nrel.gov.
