## Overview

---

The essential components of a solar racking system include flashings, mounts, rails, and clamps. The right racking equipment for your system primarily depends on your roof type. From there, you'll have a few brands to choose from--but usually, your installer will have preferred racking. Simply put, racking is the engineered structure that securely holds solar modules in place, whether on a roof, over a parking lot, or on the ground, and ensures that your entire solar installation functions safely and effectively. These structures are generally made of aluminum and stay hidden from the top. Flush Mounts: Flush mounts involve directly attaching solar panels.
