

# Which is safer a power cabinet or a rack-mount type

## Overview

---

Cabinets are safer for Li-ion batteries. Cabinets need more space because. Data center operators use racks and cabinets to house and organize their servers, networking and telecommunications gear and other IT equipment, but while “racks” and “cabinets” are sometimes used interchangeably, there are differences between the two. The main difference is that racks are open and. Early on in a UPS design a decision must be made on whether batteries should be installed on racks or in cabinets. The following are typical design considerations. Battery technology Vented lead-acid (VLA) (frequently referred to as “flooded” or “wet cell”) batteries, which. When deciding between a cabinet and a rack for storing Li-ion battery packs, you must consider several factors. Scalability becomes important if you plan to expand your energy system in the future. A floor standing PDU, or a cabinet PDU, is a large, three-phase power distribution unit that comes enclosed in its own cabinet.

## Which is safer a power cabinet or a rack-mount type
